Loyalty Cards

4POWER mCommerce Platform - end to end technology solution

### mPOS (Mobile Point of Sale)

The mPOS is designed for secured card transactions and helps Banks and Merchants deploy card payment solutions; quickly and cost effectively.

### mWallet (Mobile Wallet)

mWallet helps you increase customer loyalty and increase profit margins by identifying customer spending patterns, analysing buying behavior.

### Security

4POWER's secure authentication guarantees your transaction's security at every stage, with low operating and deployment costs.

### Portal

4POWER Portal is a secure payment switch to process your transactions and connects seamlessly to established payment networks.

### Architecture

Robust, scalable, flexible, quick deployment and easy to maintain, the 4POWER system gives measurable and significant ROI
